

# SPECIAL RELEASE

## HIGHLIGHTS OF THE APRIL 2017 PRICE SITUATION IN LEYTE (2006=100)

### Inflation rate in Leyte posts at 3.3 percent in April

Inflation rate in Leyte slightly increased at 3.3 percent in April 2017, representing an increase by 0.5 percentage point compared to the 2.8 percent inflation rate in the previous month. Average provincial inflation

rate in Leyte is higher than the regional average since April 2016 except in November until the reference period. The region's inflation rate posted at 4.1 percent during the month in review.

Most of the commodity groups contributed to the 3.3 percent overall inflation rate which include Housing, water, electricity, gas and other fuels (7.8 percent); Alcoholic beverages and tobacco (4.5 percent); Education (3.8 percent); Transport (3.4 percent); Food and non-alcoholic beverages (2.5 percent); and Health (1.2 percent). The rest of the commodity groups registered acceleration ranging from 0.2 to 1.0 percent.

On the other hand, of the major commodity groups, only Health recorded a drop in inflation rate from 1.3 percent in March to 1.2 percent in April 2017 due to

the decrease in the inflation rate of Medical Products, Appliances and equipment by 0.3 percentage points.

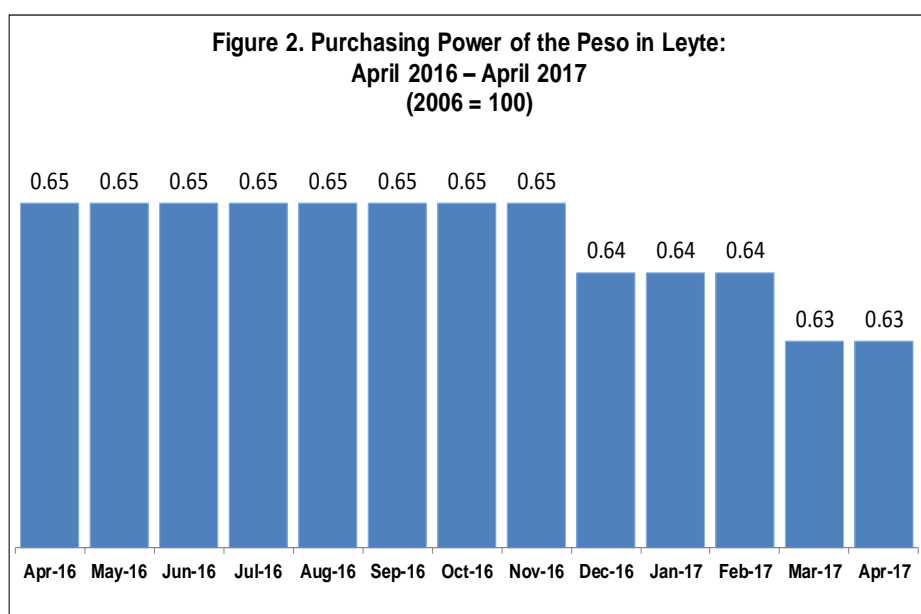

Previous month’s inflation rate for Alcoholic Beverages, Clothing and Footwear, Furnishings, Household Equipment and Routine Maintenance of the House, Communication, Education and Restaurant and miscellaneous goods and services were maintained during the month-in-review.

Inflation rate is the general rise of prices over a period. It indicates how fast or how slow changes over two time periods. Contrary to common knowledge, low inflation does not necessarily connote that prices are falling, rather, it means that prices continue to increase at a slower rate. It is a derived indicator of the Consumer Price Index (CPI).

The CPI is a measure of change in the average retail prices of goods and services commonly purchased by a particular group of people in a particular area. The overall CPI in Leyte for April 2017 was recorded at 158.1. This means that the average retails prices of goods and services in Leyte is 58.1 percent higher than the average retail prices in 2006 (base year).

**Purchasing Power of Peso (PPP) remains at 63 centavos in April**

Purchasing Power of the Peso in Leyte for April 2017 was maintained during the reference month at 63 centavos, the same level for Region 8. This purchasing power of the peso indicates that the

same basket of goods and services worth 63 pesos in 2006 (base year) is now worth 100 pesos during the reference period.

## TECHNICAL NOTES

Rebasing of the CPI is necessary to ensure that this barometer of economic phenomena is truly reflective of current situation. Consumer taste, fashion and technology change over time causing the fixed market basket of goods and services to become outmoded. To capture such changes for a more meaningful price comparison, revision or updating of the fixed market basket, the sample outlets, the weights and the base year had to be done periodically.

**BASE PERIOD** – refers to the reference period of the index number. It is period at which the index is set to 100. Current base period is 2006.

**MARKET BASKET** - refers to a sample of goods and services used to represent all goods and services bought by a particular group of consumers in a particular area.

**WEIGHTS** -The weights for the 2006-based CPI were derived from the expenditure data of the 2006 FIES, a nationwide survey that covered around 44,542 sample households. The weight for each item of expenditure is a proportion of that expenditure item to the total national expenditure. The total (all items) national expenditure weights is equal to 100.

**MONITORING OF PRICES** - is to establish baseline information for prices of the items in the base year and monitoring of the prices of the items on a regular basis.

Except for Food, Beverage and Tobacco which is monitored on a weekly basis in NCR, price collection is done twice a month. First collection phase is done during the first five days of the month while the second phase is on the 15th to 17th day of the month.

**COMPUTING THE CPI** - The formula used in computing the CPI is the weighted arithmetic mean of price relatives, a variant of the Laspeyres formula with fixed base year period weights

**RETAIL PRICE** - refers to the actual price at which retailers sell a commodity on spot or earliest delivery, usually in small quantities for consumption and not for resale. It is confined to transactions on cash basis in the free market and excludes black-market prices and prices of commodities that are on sale as in summer sales, anniversary sales, Christmas sales, etc.

**CONSUMER PRICE INDEX** – is a measure of change in the average retail prices of goods and services commonly purchased by a particular group of people in a particular area.

**INFLATION RATE** – refers to the annual rate of change or year-on-year change in CPI.

**PURCHASING POWER PESO** – is am measure of how much the peso in the base period is worth in another period. It gives as indication of the real value in a given period relative to the peso value in the base period.
