Date Released: 17 June 2025

Monthly Inflation Rate in Samar

Inflation Rate in Samar by Commodity Group

Technical Definition

CONSUMER PRICE INDEX- an indicator of the change in the average prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

INFLATION RATE- the annual rate of change or the year-on-year changes in CPI. It indicates how fast or how slow price changes over two time periods (year-on-year). Contrary to common knowledge, low inflation does not necessarily connote that prices of commodities are falling. It means that prices continue to increase but at a slower rate.

PURCHASING POWER OF PESO (PPP) - gives an indication of the real value of peso (how much it is worth) in a given period relative to its value in the based period. It is computed as the reciprocal of the CPI multiplied by 100.
