

SPECIAL RELEASE

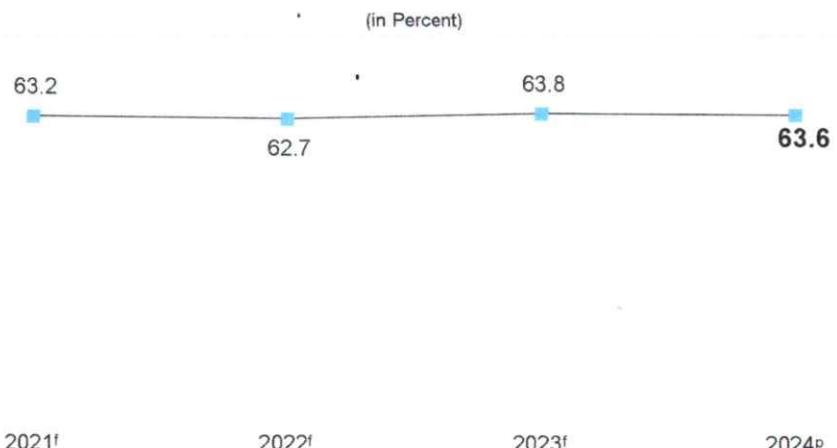

2024 Annual Provincial Labor Market Statistics for Eastern Visayas (Preliminary Results)

Date of Release: 08 August 2025
Reference No. SR-2025-08-0800-36

Labor Force Participation Rate

In 2024, Eastern Visayas registered a Labor Force Participation Rate (LFPR) of 63.6 percent. This was 0.2 percentage point lower than the 63.8 percent LFPR reported in 2023. The 63.6 percent LFPR corresponds to around 2.13 million persons who were in the labor force out of the 3.34 million population 15 years old and over in 2024 (Table 1 and 2).

Labor Force Survey Special Release

Among regions, BARMM registered the highest LFPR in 2024 at 73.5 percent, followed by Caraga and SOCCSKSARGEN at 70.5 percent and 69.1 percent, respectively. The lowest LFPR was reported in Bicol Region at 59.3 percent. Eastern Visayas was among the seven (7) regions with LFPRs lower than the 64.4 percent national estimate (Figure 2).

Figure 2. Labor Force Participation Rate by Region, Philippines: 2024^p

Among the six (6) provinces in the region, Southern Leyte registered the highest LFPR at 69.5 percent in 2024. This means that out of the 314 thousand population aged 15 years and over in the province, around 218 thousand persons belong to the labor force population (Table 2). Northern Samar recorded the second highest LFPR at 68.5 percent, followed by Biliran and Eastern Samar, both at 64.5 percent and Samar with 61.7 percent. Leyte posted the lowest LFPR at 61.4 percent. Meanwhile, Tacloban City, the lone Highly Urbanized City (HUC) in the region, posted 61.6 percent LFPR in 2024 (Figure 3).

Employment Rate

There were 2.07 million employed persons out of the 2.13 million persons in the labor force of Eastern Visayas in 2024. This placed the region's employment rate at 97.2 percent, which improved by 1.0 percentage point compared with the 96.2 percent employment rate in 2023 (Table 3). This was the highest employment rate since 2021 when the region posted an employment rate of 93.4 percent (Figure 4).

Among regions, CAR, Cagayan Valley and Zamboanga Peninsula reported the highest employment rate at 97.5 percent. SOCCSKSARGEN and Eastern Visayas followed with 97.3 percent and 97.2 percent, respectively. CALABARZON registered the lowest employment rate at 94.4 percent during the year. Eastern Visayas belonged to the 10 regions of the country with employment rate higher than the 96.2 percent national estimate (Figure 5).

Among provinces in the region, Northern Samar posted the highest employment rate in Eastern Visayas in 2024 at 98.1 percent. This means that there were 301 thousand persons who were employed out of the 306 thousand population in the labor force of the province (Table 3). The second highest employment rate was reported in Eastern Samar at 97.5 percent, followed by Southern Leyte at 97.3 percent, Samar at 97.1 percent, and Biliran at 97.0 percent. Leyte reported the lowest employment rate at 96.9 percent. Tacloban City, the lone Highly Urbanized City (HUC) in the region, recorded 97.1 percent employment rate during the year in review (Figure 6).

Unemployment Rate

There were 59 thousand unemployed persons out of the 2.13 million population in the labor force of Eastern Visayas in 2024 (Table 4). This translates to an unemployment rate of 2.8 percent, which was 1.0 percentage point lower than the 3.8 percent unemployment rate in 2023 and the lowest since 2021 when the region posted 6.7 percent unemployment rate (Figure 7).

Among regions, CALABARZON posted the highest unemployment rate in the country in 2024 at 5.6 percent. The lowest unemployment rate was posted at 2.5 percent recorded in CAR, Cagayan Valley and Zamboanga Peninsula. Eastern Visayas was among the ten (10) regions with unemployment rates lower than the 3.8 percent national estimate (Figure 8).

Among the provinces in Eastern Visayas, Leyte reported the highest unemployment rate at 3.1 percent, which was equivalent to 26 thousand unemployed persons out of the 835 thousand persons in the labor force of the province in 2024 (Table 4). The second highest unemployment rate was noted in Biliran at 3.0 percent, followed by Samar at 2.9 percent, Southern Leyte at 2.7 percent and Eastern Samar at 2.5 percent. Northern Samar posted the lowest unemployment rate at 1.9 percent. Meanwhile, Tacloban City, the lone HUC in the region, posted 2.9 percent unemployment rate in 2024 (Figure 9).

Underemployment Rate

Underemployed population is the proportion of employed population who expresses the desire to have additional hours of work in their present job, or an additional job or to have a new job with longer working hours. Eastern Visayas recorded 16.2 percent underemployment rate in 2024. This means that there were 336 thousand underemployed persons out of the 2.07 million employed persons in 2024 (Table 5). The region's underemployment rate has been fluctuating in the past four years recorded at 20.9 percent in 2021, 16.0 percent in 2022, 17.3 percent in 2023 and 16.2 percent in 2024 (Figure 10).

f - Estimates are final.

Source: Philippine Statistics Authority, 2021, 2022, 2023 and 2024 Labor Force Survey

Among the regions in the country, SOCCSKSARGEN registered the highest underemployment rate in 2024 at 30.7 percent, while Davao Region posted the lowest underemployment rate at 4.4 percent. Eastern Visayas was one of the eight (8) regions that reported an underemployment rate higher than the 11.9 percent national estimate in 2024 (Figure 11).

Figure 11. Underemployment Rate by Region, Philippines:
2024^p

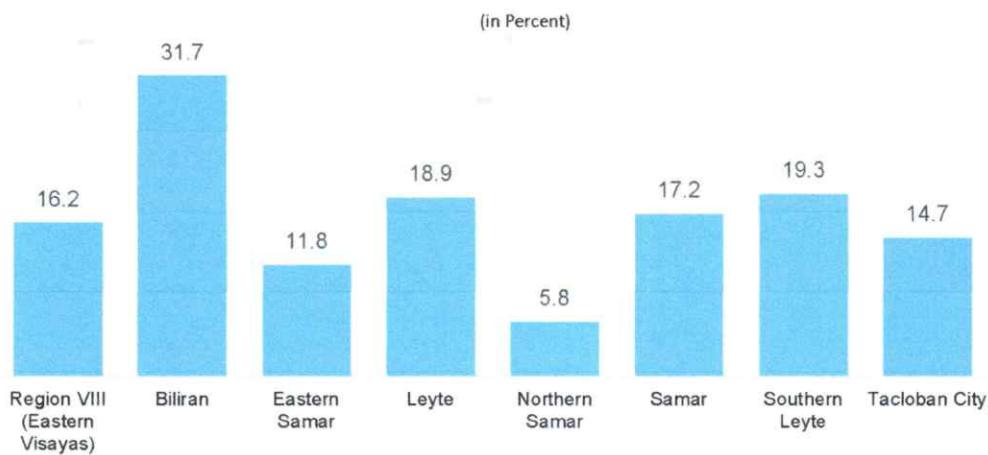

Note:

p - Estimates are preliminary and may change.

Source: Philippine Statistics Authority, 2024 Labor Force Survey

All provinces in Eastern Visayas reported double-digit underemployment rates except Northern Samar, which posted a lower rate at 5.8 percent. Biliran posted the highest rate at 31.7 percent, Southern Leyte ranked second at 19.3 percent, Leyte at 18.9 percent, Samar at 17.2 percent, and Eastern Samar at 11.8 percent. Tacloban City posted 14.7 percent underemployment rate in 2024.

^p - Estimates are preliminary and may change.

f - Estimates are final.

Notes:

1. Details may not add up to totals due to rounding.
2. The methodology for the computation of annual estimates of labor and employment indicators is based on the Philippine Statistics Authority (PSA) Board Resolution No. 14 Series of 2021 - Adopting the General Method for Annualized Estimates for the Labor Force Survey 2021 and Beyond.
3. Caution on the use of the statistics with Coefficient of Variation greater than 10% as these may not be reliable due to small observations.
4. Annual 2024 estimates were based on the final estimates of January 2024 LFS and preliminary estimates of February, March, April, May, June, July, August, September, October, November, and December 2024 LFS.
5. The 2023 and 2024 estimates for Bangsamoro Autonomous Region in Muslim Mindanao (BARMM) include the 63 barangays from Cotabato. This change follows the Bangsamoro Autonomous Act Nos. 41 to 48, dated 15 September 2022, and the subsequent ratification through a plebiscite conducted on 13 April 2024. These acts resulted in the creation of eight new municipalities within the Special Geographic Area (SGA) of BARMM.
6. BARMM includes the Province of Sulu.

^p - Estimates are preliminary and may change.

^f - Estimates are final.

Notes:

1. Details may not add up to totals due to rounding.
2. The methodology for the computation of annual estimates of labor and employment indicators is based on the Philippine Statistics Authority (PSA) Board Resolution No. 14 Series of 2021 - Adopting the General Method for Annualized Estimates for the Labor Force Survey 2021 and Beyond.
3. Annual 2024 estimates were based on the final estimates of February, March, April, May, June, July, August, September, October, November, and December 2024 LFS.

Technical Notes
Annual Labor Force Survey

The Labor Force Survey (LFS) is a nationwide survey of households conducted by the Philippine Statistics Authority (PSA) to gather data on the demographic and socio-economic characteristics of the population. The LFS aims to provide a quantitative framework for the preparation of plans, and formulation of policies affecting the labor market. Specifically, the survey is designed to provide statistics on levels and trends of employment, unemployment, and underemployment for the country, as a whole, and for each of the administrative regions.

Originally, the LFS was being conducted on a quarterly basis, specifically in January, April, July, and October. Starting 2021, special rounds of LFS, known as monthly LFS were conducted in response to the need for high-frequency data to monitor the impacts of the COVID-19 pandemic on the Philippine labor market. These special LFS rounds are conducted in between the regular rounds of LFS, in February, March, May, June, August, September, November, and December.

With the addition of the monthly surveys in 2021, the increased frequency of data collection introduced new challenges in estimating the annual labor statistics. Therefore, the PSA adopted an official estimation methodology for annual LFS through PSA Board Resolution No. 14, Series of 2021, enabling the generation of labor and employment statistics at the national, regional, provincial and HUC levels.

The LFS uses the 2009 Philippine Standard Industrial Classification (PSIC), 2012 Philippine Standard Occupation Classification (PSOC) and the 2017 Philippine Standard Classification of Education (PSCED). A hybrid approach was used in data collection, a mixed mode of Computer Aided Personal Interviewing (CAPI) face-to-face interview, whenever possible, or a telephone interview. The reference period for this survey is the "past week" referring to the past seven days preceding the date of visit of the enumerator or the interviewer.

The Annual 2024 LFS, being a household survey, used the 2023 GeoMS frame and design in which the domain is region and province/HUC level. The 2023 GeoMS uses the results of the 2020 Census of Population and Housing (CPH). The EA Reference File (EARF) of the 2020 CPH is used as reference in constructing the Primary Sampling Units (PSU) frame, while the 2020 list of housing units for each of the PSUs is used as the SSU frame. The 2023 GeoMS covers all households in the Philippines, excluding institutional households.

Employment Status Concepts

1. "Population 15 Years Old and Over" refers to the number of population 15 years old and over excluding overseas workers.
2. "In the Labor Force" or "Economically Active Population" refers to persons 15 years old and over who are either employed or unemployed in accordance with the definitions described below:
3. Employed refers to persons 15 years old and over who during the reference period are reported either:
 - a. At work, i.e., those who do any work even for one hour during the reference period for pay or profit, or work without pay on the farm or business enterprise

Labor Force Statistics Special Release

-
- operated by a member of the same household related by blood, marriage, or adoption; or
- b. With a job but not at work, i.e., those who have a job or business but are not at work because of temporary illness or injury, vacation, or other reasons. Likewise, persons who expect to report for work or to start operation of a farm or business enterprise within two weeks from the date of the enumerator's visit are considered employed.
 - 4. Underemployed refers to employed persons who express the desire to have additional hours of work in their present job, or an additional job, or a new job with longer working hours. Visibly underemployed persons are those who work for less than 40 hours during the reference period and want additional hours of work.
 - 5. Unemployed persons include all those who, during the reference period, are 15 years old and over as of their last birthday, and reported as persons:
 - a. Without work, i.e., had no job or business during the reference period; and
 - b. Currently available for work, i.e., were available and willing to take up work in paid employment or self-employment during the reference period, and/or would be available and willing to take up work in paid employment or self-employment within two weeks after the interview date; and
 - c. Seeking work, i.e., had taken specific steps to look for a job or establish a business during the reference period; or
 - d. Not seeking work due to the following reasons: (1) tired or believed no work available, i.e., discouraged workers; (2) awaiting results of previous job application; (3) temporary illness or disability; (4) bad weather; and/or (5) waiting for rehire or job recall.
 - 6. "Persons Not in the Labor Force" refers to persons 15 years old and over who are neither employed nor unemployed according to the definitions mentioned. Those not in the labor force are persons who are not looking for work because of reasons such as housekeeping, schooling and permanent disability. Examples are housewives, students, persons with disability, or retired persons.
