**16,085 or 60.4 percent**

of the household population

More males (51.9%) than females (48.1%)

#### Dependency Ratio

Young Dependents: below 15 years old

Old Dependents: 65 years and over

**66 dependents per 100 persons in the working-age group**

55 young dependents

10 old dependents

#### Children below 5 years old

**2,704 or 10.2 percent**

of the household population

There were 110 males per 100 females in children under 5 years old

#### Technical Notes:

**Aging index** is calculated as the number of persons 60 years old and over per one hundred persons under the age of 15 years.

**Median age** is the age that divides the population into two numerically equal groups; that is, half of the population are younger than this age and the other half are older.

**Household** is a social unit consisting of person or a group of persons who sleep in the same housing unit and have a common arrangement in the preparation and consumption of food.

**Household population** refers to all persons who are members of the household.

**Overall dependency ratio** is the number of persons under 15 years old (young dependents) and persons aged 65 and older (old dependents) per one hundred persons 15 to 64 years old (working-age or economically-productive group) in a population.

**Population pyramid** is a bar chart, arranged vertically, that shows the distribution of a population by age and sex. By convention, the younger ages are at the bottom, with males on the left and females on the right.

**Sex ratio** is the number of males per one hundred females in a population.
